

Career Objective

A recent **Bachelor of Information Technology (Software Development)** graduate from **Griffith University**, with hands-on experience in **web and mobile application development** using **JavaScript (React, Angular), Python, Flutter, and PHP (Laravel)**. During my internship as a Software Developer, I gained practical experience in developing scalable applications and working with various technologies. This role fits perfectly with my career aspirations as it offers the opportunity to enhance my skills in **API development, microservices, and cloud platforms** while working in a collaborative and growth-focused environment. I bring a strong foundation in **programming, problem-solving, and communication**, along with a passion for continuous learning and contributing to a dynamic development team.

Technical Skills

Programming Languages: JavaScript (React, Angular), Python, PHP (Laravel), Java

Mobile App Development: Flutter, React Native

Database Management: MySQL

Version Control: Git, GitHub

Cloud Computing: AWS (Basic)

Web Development: HTML, CSS, JavaScript, REST APIs

Frameworks and Libraries: React, Angular, Laravel, Flutter

Education

Professional Year

Performance Education, Brisbane

Dates: Feb 25 - Present

Key Subjects: Australian Business Culture and Environment, Achieving Career

Success, Australian Workplace Skills and Professional Business Communication

Bachelor of Information technology (Software Development)

Griffith University, Gold Coast

Dates: 2/23 - 12/24

GPA: 6.19 | Griffith Award for Academic Excellence (2023, 2024)

Key coursework: Web Application Development, Software Engineering, Mobile App Development, Games Development, Big Data Analytics, Home Automation & Robotics

Diploma of Information technology

Griffith College, Brisbane

Dates: 6/23 – 2/23

Key learning areas included: Web Technologies, Networks, HCI, Data Management, Programming

University Project

Fake Store E-commerce App

Griffith University, Gold Coast

Dates: 4/24 – 6/24

Objective: Develop a mobile e-commerce app with dynamic product listings, cart functionality, and order history import, providing users with a complete shopping experience.

Tools: React Native, Redux, JavaScript, Firebase, GitHub

Duties: As the sole front-end developer, I created screens for Category, Product List, Product Detail, Shopping Cart, and My Orders. I designed and integrated the splash screen, implemented

smooth navigation, and used Redux for state management and Firebase for data storage and order management.

Outcome: Successfully developed a mobile e-commerce app with dynamic product listings, cart functionality, and smooth navigation using Redux and Firebase, receiving positive class feedback.

Result: Obtained **High Distinction** for this project.

Work Integrated Learning Management App

Dates: 4/24 – 6/24

Griffith University, Gold Coast

Objective: The goal of this project was to develop a web application for managing Work Integrated Learning (WIL) projects, enabling users to manage projects, track progress, and collaborate with supervisors. The app allows Industry Partners (InPs) to post projects, students to apply, and both parties to interact in a structured manner for a smooth WIL experience.

Tools: Laravel, PHP, Blade, JavaScript, CSS, MySQL, GitHub

Duties: Designed and developed front-end (Blade, CSS, Bootstrap) and back-end (Laravel, MySQL) features, including authentication, project management, role-based permissions, and AJAX updates.

Outcome: The project was successfully completed, meeting all objectives of managing Work Integrated Learning (WIL) projects. It allowed users to manage projects, track progress, and collaborate with supervisors seamlessly. The application was well-received during presentation, with positive feedback on its functionality and user experience.

Result: Obtained **High Distinction** for this project.

Employment History

Software Developer Intern

Dates: 06/23 – 10/23

Stegowl Media Labs, Gold Coast, Australia (Remote - Ahmedabad, India)

- Developed a full e-commerce platform for a furniture shop, including an admin panel and customer-facing interface.
- Implemented back-end operations using Laravel and PHP to manage products and orders efficiently.
- Designed front-end components with HTML, CSS, Bootstrap and JavaScript to enhance user experience and functionality.

Social Media / Digital Marketing

Dates: 02/23 – 10/24

Baskk Italian, Gold Coast, Australia

- Managed Google and social media accounts, growing the brand's online presence.
- Created and optimized ad campaigns, driving increased engagement and traffic.
- Analyzed performance metrics to improve campaign effectiveness.

Personal Attributes

- **Strong Communication Skills:** Demonstrated in my internship at Stegowl Media Labs where I regularly interacted with cross-functional teams to gather requirements and provide progress updates, ensuring smooth project execution.
- **Problem-Solving Abilities:** Proven during the development of an e-commerce platform for a furniture shop, where I identified and fixed bugs, improving the user experience and streamlining order management.
- **Adaptability:** Displayed when transitioning between roles in web development and digital marketing, quickly learning new technologies like Laravel for back-end development and optimizing social media strategies for Baskk Italian to grow its online presence.
